

Hello

Thank you for your interest in fostering with Knowles Centre Treatment Foster Care Program. Currently in Manitoba, over 300 children are in need of a safe home and caring family – some for a short time, others for much longer.

Being removed from family can be traumatizing for any child. Those we serve, however, face even greater challenges. They may have witnessed violence and addictions; been victim to emotional, sexual or physical abuse or neglect; or struggle with developmental or cognitive challenges. You can imagine these experiences manifest themselves in many ways.

**We believe the past does not define one's future;  
with support, every child can reach their full potential.**

That is where the “treatment” part of our program comes in. We bring together professional treatment services for children and youth who are overcoming difficulties with the strengths of caring people from the community. Could this be you?

As a foster parent, you would be:

- welcoming a single child, or a sibling group of two or three children into your home
- central to the treatment team and the best advocate for your foster child
- experienced in working with young people in different situations
- open to supporting the relationship between the foster child and their bio family
- positively impacting a child for life!
